Adapter Construction

The adapter is made up of 3 sub-assemblies. They assemble via connectors making the adapter modular. This way the sub-assemblies can be replaced when they wear out.

When disassembling the adapter take care not to bend the pins. When reassembling the adapter note the pin 1 indicators to align the parts correctly.

Test Socket

Lidded QFP test socket:

Enplas Part #: FPQ-44-0.8-06T LSC Part #: 44QF-06T

44QFP-6T

Accepts the test socket and connects to the bottom board.

MACH210 BASE

Performs the wiring shown in the Adapter Wiring section.
