Adapter Construction

The adapter is made up of 2 sub-assemblies. They assemble via connectors making the adapter modular. This way the sub-assemblies can be replaced when they wear out.

When disassembling the adapter take care not to bend the pins. When reassembling the adapter note the pin 1 indicators to align the parts correctly.

Test Socket

SO Lidded test socket:

Enplas Part #: FP-8(16H)-1.27-05 LSC Part #:8(16H)SD-05

The 8 pin sockets are depopulated from 16 pins to fit the device. The sockets are removable so that they may be replaced if damage occurs. They are depopulated at the Pin 1 end. If you remove the socket be sure to replace it with the hinge at the Pin 1 end.

PA8SO105

Accepts the test socket and remaps the pins to the DIP plug.
